

**Bibliografia propusa pentru concurs:**

- Imunologie fundamentala, Virgil Paunescu, Jean-Claude Homberg, Ed Orizonturi Universitare, Timisoara, 1999.
- Cellular and molecular immunology, Abul K Abbas, Ed Elsevier, 2007.
- Essential Immunology, I Roitt, P Delves, S Martin, D Burton, 2006.
- Freshney I., Culture of Animal Cells: A Manual of Basic Technique, Ed. Wiley Liss, 2005
- Pfranger R., Freshney I., Culture of human tumor cells, Ed. Wiley Liss, 2004
- Picot J., Human Cell Culture Protocols (Methods in Molecular Medicine), second ed., Humana Press, 2005
- Watson JD et al., Molecular Biology of the Gene, 6th Ed., Benjamin Cummings, 2007.
- Templeton NS. Gene and Cell Therapy: Therapeutic Mechanisms and Strategies, 3rd Ed., CRC Press, 2008.
- Thieman WJ, Palladino MA. Introduction to Biotechnology, 2nd Ed., Benjamin Cummings, 2008.
- Medical Physiology, ed. XI, Guyton AC, Hall JE, W.B. Saunder Company, 2005
- Principles and Practice of Infectious diseases, G.L. Mandell, fourth edition, 1995
- Medical Microbiology, Patrick R. Murray, second edition, 1994
- R. J. McKinlay Gardner, Grant R. Sutherland, Chromosomes Abnormalities and Genetic Counseling, Third Edition, ISBN 978-0-19-514960-9, Oxford, 2004
- Patricia A. Hoffee, Medical Molecular Genetics, First Edition, Fence Creek Publication, ISBN 1-889325-28-7, 1998
- Nicholas C. Dracopoli & colab, A Compendium of Methods from Current Protocols in Human Genetics, Ed. Wiley, ISBN 0-471-694118-5, 2004
