

Anexa B

Cod de procedura/Categorie majora de diagnostic (CMD) /Index DRG

Această anexa listează fiecare cod de procedura RO DRG v1 și da detalii despre CMD-uri și DRG-urile în care sunt cuprinse. Procedurile care nu se efectuează în sala de operații sunt indicate prin † urmând codului de procedura. Sunt excepții codurile de procedura care apar la Pacemaker și care nu sunt legate de activități procedurale la sala de operații (listate la sfârșitul Volumului 2). Activitatea procedurală care nu este legată de sala de operații conține logica ce definește DRG-urile care sunt abateri de la regulile de diagnostic și procedura.

Unele coduri de procedura sunt listate numai într-un singur CMD.

Un cod de procedura poate fi listat la mai multe DRG-uri din mai multe CMD-uri diferite. De exemplu, listarea pentru codul de procedura J07704 *Excizie a mucoasei rectale pentru prolaps rectal* este

| Cod | CMD |
|--------|-----|
| J07704 | 06 |
| | 21 |

Un cod de procedura poate fi listat la mai multe DRG-uri la diferite GDRG-uri într-un singur CMD

Această anexă nu listează toate codurile de procedura RO DRG v1 – codurile nefolosite pentru alocarea unui DRG sunt excluse

Când luăm în considerare o înregistrare care conține mai mult de o procedură, ar trebui să fie folosită această anexă pentru a obține detalii ale posibilelor DRG-uri chirurgicale sau 'alte DRG-uri' pentru fiecare cod. Dacă există proceduri în sala de operații pe înregistrare, dar nici una nu este listată la DRG-uri pentru un CMD adecvat, înregistrarea va fi alocată la unul din DRG-urile Abatere 91010, 91920 sau 91030. Altminteri, acolo unde mai mult de unul dintre codurile de procedura listează DRG-uri chirurgicale sau 'alte DRG-uri' pentru CMD, ierarhiile chirurgicale sau 'alta' din cadrul CMD vor determina în cele din urmă alocarea DRG-ului.
